Company: Nuh Çimento San. A.Ş.

Position: Business Development Manager

Proposed Project Information

Project Title: Creating of Contract Management System

Planned Start Date: 15.06.2020

Planned End Date: 15.08.2020

Project Overview: As the Supply Chain Department, we sign many contracts with different suppliers. Our system is not integrated with SAP and all our data are in an excel file. For this reason, we want to create a contract management system which helps us to track important information about contracts and all system should be visualized with a visualization tool (Power BI, Tableau, Qlikview, Python etc.) by top management.
