Position: Business Development Manager

Proposed Project Information

Project Title: Weighbridge System Optimization Project

Planned Start Date: 15.06.2020

Planned End Date: 15.07.2020

Project Overview: As Nuh Cement, we have different weighbridge systems in our factory. These systems should be integrated with our ERP system (SAP) and loaded trucks. There are many ways to accomplish this project, but we want to find the best and minimum cost solution. Therefore, we need a preliminary study that helps us find the best way for this project.
