

IE375 Spring Semester 2024

Reading List for Forecasting:

Readings from the Text book - 7th Edition

Chapter 2 (except 2.3, 2.10, 2.12 and 2.14)

Section 2.3 is for subjective forecasting. There will be no questions asked on this topic, but is recommended for those of you who are interested in the forecasting topic.

Section 2.10 is on Box-Jenkins Model – This topic is a bit advanced compared to the other parts in Forecasting. However, you might want to learn and use it for your project work next year, if you are doing anything related to forecasting.

Section 2.12 is an introduction to more advanced topics. Section 2.14 is a connection to the other literature for forecasting (for topics not covered, as well as advanced topics).
